

Flush Window Series

Our signature Storm-Tite brand Flush Window Series was designed to address the needs of the more style-conscious fleet operators that place a high value on “road appeal”. The flush window’s streamlined appearance creates an aerodynamic and visually appealing effect that is truly impressive on the road.

With an exterior comprised entirely of tempered safety glass or polycarbonate, the windows do not include the use of painted metal panels that are susceptible to fading from environmental exposure.

Available in either serviceable or non-serviceable design configuration, this model series utilizes the same superior water management system that is typical for AROW Global products and combines a simple, high performance design with attractive interior and exterior aesthetics.

Product Features:

- Fixed, full-height-slider, and tip-in combination configurations available
- All configurations available in egress or non-egress style
- Glazing available in tempered glass and polycarbonate
- Interior graffiti protection options available for additional vandal resistance
- Superior weather tight design
- Premium fasteners and hardware
- Exceptional functional performance
- Built and tested in accordance with FMVSS 217 guidelines with materials that conform to the applicable requirements of ANSI Z26.1 and the recommended practices defined in SAE J673

Product Assembly Options

SERVICEABLE GLAZING:

Glazing replacement has never been easier. Through the use of a hinging mechanism you can now replace the entire glazing assembly in less than four minutes.

- Replacement of glazing assembly requires removal of a few fasteners and manipulation of upper hinge joint.
- No removal of any components necessary for removal/replacement of optional sacrificial shield.

NON-SERVICEABLE GLAZING:

Our Storm-Tite Flush Windows Series are also available in a non-serviceable configuration. These windows have no upper hinge mechanism and are mounted directly onto the bus.

Custom Windows:

AROW Global is constantly seeking out new markets and application for our glazing systems. Through close customer partnerships and strategic design initiatives, we have developed systems specifically suited to the needs of specific customers. When it comes to glazing and window systems, AROW knows no boundaries.
